

A large, detailed photograph of the Statue of Liberty, showing her from the waist up. She is holding a torch in her right hand and a tablet in her left. The statue is green and stands against a clear blue sky. The base of the statue is visible at the bottom.

# How is your sight seeing?

Your world might look different or exactly the same. Either way, you have no way of knowing if you are at risk of serious sight loss unless you have a sight test.

A sight test is a vital health check. Most people need a sight test every two years.

**So book a test today and show you care about eye care!**
